**Amendments to the Specification**

Please replace the paragraph beginning at page 1, line 9, with the following rewritten paragraph that changes the Application Number to the Patent Number. No new matter has been added.

In co-pending Application Number 10/033,810[[—, —], now Patent Number 6,754,734, entitled "Systems, Methods, and Computer Program Products to Improve Performance of Ported Applications, such as a Database," filed on the same date herewith, by William E. Malloy, et al., ~~Attorney's Docket Number SVL920010052US~~, assigned to the assignee of the present invention, and incorporated herein in its entirety by this reference, there is described a method of bypassing the general-purpose I/O caching features of a computer system in favor of the specialized I/O caching features of the application. Although not limited thereto, the present invention employs such a method in one of its preferred embodiments.
